Yosakoi festival

# Welcome to KOCHI!

Kochi Prefecture stretches from east to west, seeming to embrace Tosa Bay, giving a strong impression of the sea. However 84% of the prefecture is covered in forests, making it the most forested prefecture in Japan. Lots of sunlight, a mild climate, plenty of rain, and natural beauty, has given rise to delicious seasonal foods, culture, and the unique traits of the people. The bounties of the sea, vegetables, and rice can all be enjoyed at the peak of their freshness.

In the summer, people look forward to the "Yosakoi" festival. The event started in 1954 during postwar reconstruction to enliven the people and help local businesses prosper. Over 20,000 dancers participate, and the city is a flame with the passion the festival generates.

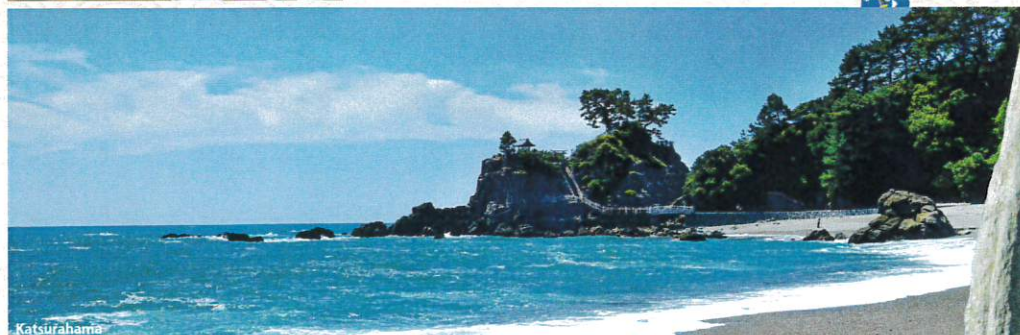

Kochi Prefecture also boasts the Niyodo River. Also called "Niyodo Blue," the pure water, nearly transparent, catches the light of the sun and the color of the sky, causing the river to shimmer a mysterious blue from the middle of August to January.

Other popular spots include the Sunday Market and the "Hirome Market," especially popular with sightseers. In the west of the prefecture, the last of the pure-water rivers in Japan, the Shimanto, flows. In April and May, the river is known for the over 500 carp streamers that can be seen billowing over the current.

In Kochi Prefecture, life can be enjoyed amidst nature, surrounded by the warmth of the people who call it home.
